EDUCATION

Raleigh, NC	North Carolina State University	Aug 2022 – Dec 2026
• Major: Computer Science, B.S • Relevant Coursework: Data Structures and Algorithms, C and Software Tools, Operating Systems, Software Engineering • Affiliations: Women and Minority in Engineering Program, Women in Computer Science, TRIO Scholar, University Ambassador		

EXPERIENCE

R&D Software Intern – Baxter International Inc., Raleigh, NC	June 2026 – Present
• Developing an AI agent to review documentation, requirements, and code for potential hazards, risks, and compliance concerns. • Reviewing ISO/IEC risk management standards and collaborating with the software team to define risk-detection use cases.	
Technical Support Technician – Textile Creative & Technology Services, NC State University	Jan 2025 – May 2026
• Provide Tier 1–2 technical support for 1,000+ faculty, staff, and students across the Wilson College of Textiles. • Troubleshoot hardware, software, classroom technology, device setup, software installation, and inventory issues.	
Software Engineering Intern – UDPlatforms, Remote	May 2025 – August 2025
• Collaborated with engineering team to design and develop new product features for UDPlatforms web application, focusing on improving user experience. • Built frontend components using React, JavaScript, ensuring responsive design and clean UI layouts. • Integrated backend API endpoints using Python to support user profiles	
Resident Advisor – NCSU housing, Raleigh, NC	May, 2024 – Jan, 2025
• Managed a community of 45 residents, using organizational and problem-solving skills to resolve issues, document incidents, and track engagement metrics.	
Events, IT Support, and Student Centers Operations Assistant – NCSU, Raleigh, NC	Jan 2023 – Feb 2024
• Supported over 300 campus events, coordinating setup, technical equipment, and troubleshooting AV/IT issues to ensure seamless execution. Provided frontline technical support for projectors, sound systems, display screens, and conference tech, resolving 90% of issues on first contact	

PROJECTS

Personal Portfolio Website HTML, CSS, JavaScript
• Designed and developed a responsive personal website from scratch to showcase projects, skills, and experience. • Implemented clean UI/UX design, custom styling, and interactive elements using vanilla JavaScript.
WolfCafe – Full-Stack Restaurant Ordering System Java, JavaScript, MySQL, REST APIs, Postman
• Built a full-stack ordering system supporting menu items, orders, and inventory management. Developed REST APIs in Java, designed relational MySQL schemas, and tested endpoints using Postman. • Collaborated in an Agile team and contributed to both backend logic and frontend features.
CoffeeMaker Application Java, OOP, Unit Testing
• Implemented a Java-based CoffeeMaker system using object-oriented principles. • Focused on clean class design, input validation, and feature correctness through testing.

INVOLVEMENT

Engineering Career Fair Ambassador North Carolina State University	2023 – Present
• Supported large-scale engineering career fairs with 300+ companies; coordinated logistics, led volunteers, and resolved technical issues to ensure smooth operations.	
Undergraduate Researcher North Carolina State University	2023 – 2024
• Conducted research on VR applications for mental health, analyzing user-study data and presenting findings through the Undergraduate Research Program	
Student Government – College of Engineering Senator	2022 - 2023
• Represented 10,000+ engineering students in policy discussions and campus initiatives; collaborated with committees to evaluate proposals and improve student services.	

CERTIFICATIONS

Microsoft Office Suite (Excel, Word, PowerPoint)
Autodesk AutoCAD, AutoDesk Inventor Professional, SOLIDWORKS

SKILLS

Programming Languages: Java, Python, JavaScript, C
Web Technologies: HTML, CSS, REST.js / RESTful APIs
Tools & Frameworks: React, Git/GitHub, SQL/MySQL, FastAPI
